

Stocking Trout into Jubilee Lake

Jubilee Lake

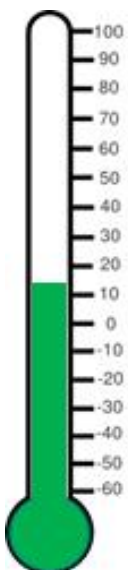

Colour the drawing

Trout need:

- water that is between 5 and 20 degrees Celsius. Any hotter or colder trout stop growing.
- insects that live in water to eat.

Before the trout are released, Hui and Saki need to check if Jubilee Lake will make a good home for them.

What temperature is the lake water? _____

Is it the right temperature for trout? _____

Find 7 pieces of trout food hiding in the weeds .

Use the grid to locate the insects! e.g A1 , _____ , _____ , _____ , _____ , _____ , _____ .

One fish has caught 4 insects, the other fish has caught 3 insects. Draw lines between each fish's mouth and its food.

Can trout be stocked (released) into Jubilee Lake? _____
