

Recreational Fishing and Boating Forums

Come join the Victorian Fisheries Authority at one of 12 free forums in August and September to talk all things fishing and boating.

You'll get the chance to hear from experts about what we've been doing to make your fishing and boating even better!

The forums also offer you the chance to talk face-to-face with our staff and share your ideas for projects that'll make a real difference in your patch.

There'll be presentations from fisheries managers, scientists, boating project managers and local Fisheries Officers, followed by question time and further discussion amongst those attending.

Our forums will be run in partnership with angling clubs across metro and regional locations. To find the locations, dates, times, and key presentation topics, please see the events schedule below.

We're looking forward to catching up.
