- 3.10, Killarney
- 3.11, Cutting
- 3.12, Thunder Pt
- 3.13, Lady Bay
- 3.14, Levys

Figure description

Figure 1. Catch Target (red open bar) and Total catch (blue bar) for each Reefcode since 2009. Only Blacklip are included for all Reefcodes, except 2.10 Hospital to 2.16 Minerva where Greenlip are also included.

Figure 2. Catch rate as a raw average of diver-days (red circles and loess line) and standardised (blue circles and loess line, and normalised to the raw average in the most recent year) for each Reefcode since 2009. Only Blacklip are included for all Reefcodes, except 2.10 Hospital to 2.16 Minerva where Greenlip are also included.

Figure 3. Average length of logger-measured abalone ≥ 135 mm per diver-day (red circles and loess line, where $n > 50$ measured per day and reefcode) and percent of small abalone < 135 mm per diver-day (blue circles and loess line, shown only where size limit was < 135 mm) for each Reefcode since 2009.

Figure 4. VFA Survey indexes (t per Ha) for 4 SMU including the related Reefcode, with Legal biomass (red circles and loess line, $\geq 130\text{mm}$), Mature biomass (blue circles and loess line, $>102\text{ mm}$) and Undersize biomass (i.e. 110-130 mm, as green circles and loess line).
