Australian Fish Names Standard

Seafood Services
AUSTRALIA

This Australian Standard® was prepared by Seafood Services Australia Limited. As an accredited Standards Development Organization, Seafood Services Australia Limited develops and publishes seafood standards. The Standard was endorsed on behalf of the Council of Standards Australia on 16 July 2007. It was published on 30 October 2007.

This Standard was issued in draft form for comment as DR 06449.

Seafood Services Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Fish Names Committee of Seafood Services Australia Ltd.

The following are represented on the Fish Names Committee (FNC):

Voting members

Seafood Services Australia (FNC Chair)
Australian Seafood Industry Council (one member)
Seafood Importers Association of Australia (one member)
Recreational Fishing Representative (one member)
Australian Fisheries Managers Forum (two members)
Expertise based members (three members)
Consumer representative (one member)

Non-voting advisers

CSIRO (three members)

Non-voting FNC Secretariat

Australian Food and Grocery Council
Department of Environment and Heritage
Australian Quarantine Inspection Service Exports
Australian Quarantine Inspection Service Imports
Department of Agriculture, Fisheries and Forestry
Food Standards Australia New Zealand
Aquarium industry
Major grocery retailers

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting www.standards.org.au

Australian Standards developed by the Seafood Services Australia (AS/SSA Standards) are updated, according to the needs of the industry, by amendments or revision. Users of AS/SSA Standards should make sure that they possess the latest amendments or editions.

Representations concerning the need for a change to this Standard should be addressed to:

Introduction

Need for standard fish names

Public and consumer confidence is supremely important to the well being of Australia's \$2.5 billion seafood industry. Confusion over fish names can undermine this confidence, create market impediments, undermine effective species-based fisheries management, and impede management of food safety.

Australia has over 4500 native species of finfish, and many more crustaceans and molluscs. Several hundred of these species are important commercially, and many others support recreational activities such as fishing and diving. Australia also imports seafood products consisting of many other fish species from around the world to help satisfy the increasing demand for seafood.

Confusion over fish names can be caused by the numerous species Australia has on offer, a species being known by more than one name, or the same name being used for more than one species. As early as the 1920s, meetings were held in Sydney to discuss fish names as the local and regional variations were becoming apparent.

Extensive work on standardizing names used for fish in Australia has been undertaken since the early 1980s by industry, governments, scientists and other stakeholders. Major progress has been made since 1992 as a result of strategic investments by the Fisheries Research and Development Corporation. SSA has maintained this momentum since it accepted responsibility for standardizing fish names in 2001, culminating in the development of this Standard.

The Australian Standard Fish Names List (Annex A to this Standard) now includes agreed names for over 600 commercially important domestic and imported species of fish, and over 4,000 domestic finfish. The process of assigning these agreed names drew on the expertise of several of the world's best fisheries taxonomists and other key stakeholders.

The development and maintenance of this Standard is underpinned by rigorous procedures that have been agreed to by government, industry and other stakeholders over the last two decades and which are administered by SSA and its Fish Names Committee.

Purpose of this Standard

Use of standard fish names in Australia, as defined in this Standard, will achieve outcomes that are consistent with the aims of industry and governments, including:

- improved sustainability of fisheries resources (use of standard names by all stakeholders will enable more accurate fisheries monitoring and stock assessments)
- improved industry profitability (increased efficiency in seafood marketing and consumer confidence)
- reduced public health risks (more effective management of food safety and seafood related public health incidents)
- reduced potential for misleading and deceptive conduct (more accurate trade descriptors enabling consumers to make more informed choices when purchasing seafood).

Preparation of this Standard

SSA was accredited as a Standards Australia, Standards Development Organisation in April 2006. This Standard was prepared by the SSA's Fish Names Committee (FNC) in accordance with requirements set down for developing Australian Standards. The Standard is the result of a consensus among a wide range of stakeholders and an extensive process of consultation including with the Fish Names Experts Group and the general public.

Fish Names Committee

The membership and operational procedures for the Fish Names Committee (FNC) are specified in SSA's *Fish Names Handbook*. The FNC membership reflects the important role of key stakeholders in the fish names process and ensures that the committee collectively possesses skills and knowledge relating to:

- a. seafood production/harvesting
- b. seafood marketing and trade
- c. promotion and public relations
- d. seafood consumer issues
- e. fish taxonomy and nomenclature
- f. legislation and processes relevant to the import and export of seafood
- g. government operations and processes, including regulatory issues relevant to seafood
- h. industry leadership
- i. corporate governance including the operations of Boards or committees

Seafood Services Australia

SSA is a not-for-profit company established by the Fisheries Research and Development Corporation and the Australian Seafood Industry Council to be a catalyst for sustainable development of the Australian seafood industry.

1. Scope

This Standard defines standard fish names for use in Australia and specifies when standard fish names are required to be used. The Australian Standard Fish Names List (Annex A) is incorporated into and forms part of this Standard.

1.1 Application

This Standard provides guidance on complying with requirements for the use of standard fish names in Australia, and is intended for use by people and businesses involved with fish or seafood in Australia.

2. Interpretative Guidelines

2.1 Compliance with this Standard

Requirements designated by the words 'shall' or 'shall not' are mandatory for organizations seeking to achieve compliance with this Standard.

Requirements designated by the words 'should' or 'should not' are recommended, but are not mandatory to achieve compliance with this Standard.

2.2 Abbreviations, definitions and terms

2.2.1 Application

For the purpose of this Standard, if there is conflict between the definitions in this document and those in other relevant standards or documents, the definitions herein take precedence.

2.2.2 Abbreviations

Abbreviation	Full Description
AFNS	Australian Fish Names Standard
ASFNL	Australian Standard Fish Names List (part of this standard)
ASIC	Australian Seafood Industry Council Inc.
FNC	Fish Names Committee
FNEG	Fish Names Expert Group
FRDC	Australian Government Fisheries Research and Development Corporation
SFN	standard fish name
SGN	standard group name
SSA	Seafood Services Australia Limited

2.2.3 Terms and definitions

Terms	Definitions
“annex”	an annex to this document is an integral part of the Standard
“attachments”	an attachment to this document is for information and guidance only.
“Australian Standard Fish Names List”	the database (in electronic or hard copy form) in which standard fish names are officially recorded – the list forms part of this Standard (Annex A).
“CAAB Code”	(Codes for Australian Aquatic Biota) consists of eight digits and each species is assigned a unique CAAB Code. This number is unique to Australia.
“fish”	any aquatic vertebrate or invertebrate (excluding mammals and amphibians) in any form, including whole fish, or part thereof, in raw or cooked form, or as a fish product
“scientific name”	the unique scientific name for a fish determined as per international convention and consisting of a genus name and a species name - the scientific names used in this Standard are those advised by CSIRO Marine and Atmospheric Research or another competent authority.
“standard fish name”	the standard fish name for a species of fish recorded in the ASFNL. A Standard Fish Name (SFN) may cover a single species, or all species in a particular scientific family or group of fish.
“taxonomic group name”	an animal or plant’s taxonomic group name as per international convention. The taxonomic group names used in this standard are those advised by CSIRO Marine and Atmospheric Research, or another competent authority

2.3 Footnotes

Footnotes are for information and guidance in interpretation.

3. References

3.1 Application and format

- 3.1.1 If this Standard refers to another document, the other document is a referenced document.
- 3.1.2 Where the edition (or version) of the referenced document is uniquely identified, then that edition (or version) applies.
- 3.1.3 Where the edition (or version) of the referenced document is not uniquely identified, then the applicable edition (or version) is that which is current at the date upon which the document is published.

4. Requirements for using standard fish names

4.1 Use of Standard Fish Names

4.1.1 When fish are sold or traded to consumers

Fish sold to consumers (e.g., retail sales and restaurants) shall be identified at the point of sale by the Standard Fish Name (SFN) specified for that species in the Australian Standard Fish Names List (ASFNL), and may also be identified by its scientific name.

4.1.2 When fish are sold or traded other than directly to consumers

Fish sold other than directly to consumers (eg, wholesale, export, import) shall be identified by either the SFN or scientific name for that species.

4.1.3 Standard Fish Names - Scope and Priority

A Standard Fish Name (SFN) may cover a single species, or all species in a particular scientific family or group of fish.

Fish should be identified by the SFN for that particular species only. However, the SFN for the scientific group or family to which a fish belongs may be used if:

- the fish does not have a SFN for that particular species, or
- the fish is in a batchⁱ of different species of fish, all of which are from the same scientific group or family,

AND

- using the SFN for the scientific group or family to which a fish belongs, does not mislead, misrepresent or confuse the identification of the fish.

4.2 Use of other fish names

4.2.1 When other fish names may be used

When a SFN is required to be used under this Standard, species of fish that do not have a SFN specified in the ASFNL may, subject to 4.2.2, be identified by a name that is commonly used for that species in Australia or overseas.

4.2.2 Notification of use of other fish names

A person or business using another fish name (as per 4.2.1) shall notify SSA of that use within 30 days. SSA will include all such notifications received in accordance with this subsection on the agenda of the next FNC meeting. The FNC may:

- (a) initiate a proposal for a SFN to be assigned for that species, or
- (b) require the person or business using the other name to submit an application for a SFN to be assigned for that species of fish

i For example, a batch of fish consisting of Dusky Flathead and Tiger Flathead may be identified by the SFN Flathead, which covers all species in the Flathead family.

Annex A. Australian Standard Fish Names List

Australian Standard Fish Names List forms part of this Standard

The Australian Standard Fish Names List (ASFNL) is an integral part of the Australian Fish Names Standard. The current official version of the ASFNL is available for free download from www.seafood.net.au/fishnames/list.php. Hard copies are available from Seafood Services Australia or Standards Australia.

Format and content

The ASFNL may be in electronic or hard copy form and shall, when the information exists, include at least: Standard Fish Name; SFN Scope; Scientific name; Authorityⁱⁱ; CAAB Code; Categories; Obsolete Names

Sub-lists of the ASFNL may be in electronic or hard copy form and must, when the information exists, include at least: Standard Fish Name; Scientific name; Obsolete Names

Categories

The FNC may determine categories and guidelines for assigning categories to particular species in the ASFNL. Approved categories at the date of this Version of the Standard are:

- Category A: Australian species (the species may also be imported)
- Category C: Commercial species (as advised by an industry association or fisheries agency)
- Category E: Exported species (species is exported by Australia)
- Category I: Imported species (species that are imported into Australia)
- Category R: Recreational species (as advised by RecFish Australia)

Other categories and guidelines approved by the FNC from time to time will be included as an Annex in the SSA Fish Names Handbook.

Updating the Australian Standard Fish Names List

The ASFNL will be updated as soon as practical after a new or amended SFN has been approved by the FNC, at which time any revised scientific names advised in accordance with this standard will also be incorporated.

SSA will make the current official version of the ASFNL available for free download from the Fish Names Website at www.seafood.net.au/fishnames/list.php.

SSA will email advice of the availability of each revised version of the ASFNL to subscribers on SSA's Fish Names Email List which can be subscribed to at <http://www.seafood.net.au/subscribe/>.

Versions and titles

Australian Standard Fish Names List: All species

Each updated version of the ASFNL shall be identified by incorporating the version number and date into the title, e.g: Australian Standard Fish Names List: All species: Version <no.>: <month year>

ⁱⁱ For the authority relevant to the scientific name used in this standard, refer to the CAAB (database or the Catalogue of Australian Fishes

Australian Standard Fish Names List: (sub-lists)

The FNC may approve the creation of ASFNL sub-lists that include species with similar characteristics, e.g., species relevant to a particular group, sector or fishery, imported species, etc.

Sub-lists may only include species that are listed in the ASFNL and shall be identified by including a concise descriptor of the scope of the species in the list and the version date in the title, e.g:

Australian Standard Fish Names List: Commercial species: Version <no.>: <month year>

Australian Standard Fish Names List: Imported species: Version <no.>: <month year>

Australian Standard Fish Names List: Recreational species: Version <no.>: <month year>

Australian Standard Fish Names List: <State> species: Version <no.>: <month year>

Australian Standard Fish Names List: <Fishery> species: Version <no.>: <month year>

Australian Standard Fish Names List: Species traded with <country>: Version <no.>: <month year>

Standards Australia

Standards Australia develops Australian Standards® and other documents of public benefit and national interest. These Standards are developed through an open process of consultation and consensus, in which all interested parties are invited to participate. Through a Memorandum of Understanding with the Commonwealth Government, Standards Australia is recognized as Australia's peak non-government national standards body. Standards Australia also supports excellence in design and innovation through the Australian Design Awards.

For further information visit www.standards.org.au

Australian Standards®

Committees of experts from industry, governments, consumers and other relevant sectors prepare Australian Standards. The requirements or recommendations contained in published Standards are a consensus of the views of representative interests and also take account of comments received from other sources. They reflect the latest scientific and industry experience. Australian Standards are kept under continuous review after publication and are updated regularly to take account of changing technology.

International Involvement

Standards Australia is responsible for ensuring the Australian viewpoint is considered in the formulation of International Standards and that the latest international experience is incorporated in national Standards. This role is vital in assisting local industry to compete in international markets. Standards Australia represents Australia at both the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC).

Sales and Distribution

Australian Standards®, Handbooks and other documents developed by Standards Australia are printed and distributed under license by SAI Global Limited.
